# CUSTOMIZED PROVEN PROFITABLE

Managing infiltration, erosion and nutrient run-off has become a tough and necessary business. Government regulations have become stricter. Irrigation water is becoming less available. Fortunately, there is an answer.

Figure 8 Environmental specializes in providing farm operations with services and equipment that will help ease the burden. Improving infiltration rates. Preventing topsoil depletion and nutrient loss.

Keeping tailwater clean. Saving millions of gallons of water.

And best of all, increasing profits for our clients.

## **CUSTOMIZED**

We customize every system to address your specific farming needs.

We take on those onerous tasks.

You can concentrate on what you do best...FARM.

## **PROVEN**

We use a proven method of dealing with many complex farm challenges.

We have provided profitable solutions for 30 years.

Ready to quickly be a part of your farm management team.

## **PROFITABLE**

Profit from the sustainable reuse of your farm's resources.

Find profit in unusable, waste of water and precious topsoil.

Enjoy fewer headaches and benefit from higher profitability.

### **OPTIMIZED SOIL STRUCTURE RESULTS IN BETTER CROP YIELDS**

Proper soil conditioning and structure will deliver higher crop productivity with far less tilling and soil work. Use less water. Harvest more. Work less

### **THE RIGHT TOOLS AND THE HIGHEST LEVEL OF EXPERTISE**

Figure 8 Environmental is a team of experienced industry authorities in water reuse, soil optimization and government regulations. We provide best practice solutions, products and services essential for increasing profitability on your farm.

### **POLLUTE LESS, AVOID FINES AND REAP BIGGER PROFITS**

Compliance with the **California Irrigated Lands Regulatory Program** is mandatory. Our technology helps manage farm erosion and nutrient levels in water discharged from irrigation and storm runoff.

### **CLEAN, RECYCLED WATER SAVES MILLIONS**

It's not just cost and water savings. It's pure profit.

Figure 8 Environmental provides a profitable and customizable combination of equipment, installation, management and services required by agricultural, industrial and municipal operations to manage waste and to ensure water quality.

### **EQUIPMENT**

Figure 8 Environmental is a premier provider of nutrient recovery, water and sludge treatment systems for:

*Water Clarification  
Sludge Treatment  
Manure Bedding Recovery  
Manure Nutrient Recovery  
Digester Energy Optimization*

### **SERVICES**

Figure 8 Environmental provides turnkey consulting, customized services and solutions for:

*Soil Structure Preservation  
Manure Management  
Wastewater Control  
Water Clarification and Reuse  
Sludge Dewatering  
Waste Recovery and Repurposing*

### **INDUSTRIES**

Figure 8 Environmental provides essential and profitable systems and services for:

*Agricultural Farms  
Livestock Operations  
Food Processing Facilities  
Municipal Wastewater  
Sludge Handling*
